Above and beyond – Snippets from the 3D printing industry

World's first 3D printed skyscraper to be built in UAE

(Adapted from www.independent.co.uk)

A construction firm in Dubai has announced plans to build the world's first 3D printed skyscraper. The Company called "Cazza" has confirmed that it will be erected in the UAE.

They would be using 'Crane Technique' to create the building.

Set to be built in Dubai by 2020, it will stand 1375 feet tall, with each of its 80 storeys capable of rotating individually around a concrete core.
